New Trailer for Science Saru's 'The Ghost in the Shell' Anime Series

Alex Billington · *FirstShowing.net*

Motoko Kusanagi is back! And ready for more action on the streets of Japan. Bandai Namco has revealed another exciting 45-second teaser trailer for a new version of GITS titled simply The Ghost in the Shell (with “the” in the title this time). From the acclaimed animation studio Science Saru , this is a brand new animated TV series version of the iconic sci-fi series Ghost in the Shell , which comes from a manga that has been turned into many movies & series already (here’s the first teaser for this series from a few months ago). Beginning with Shirow Masamune’s 1989 manga , The Ghost in the Shell , the franchise has since transcended media boundaries, expanding into mediums like anime, a live-action Hollywood film (remember or did we all forget it already?), and video games.

Motoko Kusanagi, also known as Major, returns again battling more cybercrime. With animation from Science Saru (Inu-oh , The Colors Within , Scott Pilgrim Takes Off , Dan Da Dan). The fresh anime arrives in Japan as a TV series launching in July 2026 - as a Prime Video exclusive which hopefully means viewable in the US as well. This was revealed as part of the AnimeJapan 2026 event happening now. So far so good, I’m really digging all this new footage and the new look of The Major. Enjoy. // Continue Reading ›

DOGE Targeting Nuclear Safety Brings Back Memories of Three Mile Island

Jill Lawrence · The Bulwark

I WAS ASKED A FEW YEARS AGO to name the biggest story I'd ever covered as a journalist. "You'd think Three Mile Island would have been the major story of my career, but history has just kept happening," I replied .

Yet even after the deadlocked 2000 election, the inauguration of the first black U. S. president, the rise of Donald Trump, and so many other huge stories, that nuclear power plant accident on March 28, 1979, is still in the running for number one. And as I periodically rediscover, it still has the power to haunt.

That's what happened last week, when ProPublica published an article by Avi Asher-Schapiro headlined " DOGE Goes Nuclear: How Trump Invited Silicon Valley Into America's Nuclear Power Regulator ." The gist: Young, unqualified, and deeply unserious DOGEbros are "forcing a 'move fast and break things' Silicon Valley ethos on one of the country's most important regulators."

"The safety culture is under threat," Allison Macfarlane, a former chair of that regulator, the Nuclear Regulatory Commission, told ProPublica. That was admirably restrained. This is a chilling investigatory account of corruption, cronyism, and lack of care.

So what else is new, you might wonder; it sounds like business as usual in the Trump era. Still, if you are a TMI "survivor," you can't look away from a chart that shows over 400 people who worked on nuclear reactors and safety have left the government since Trump took office, and only 60 people have been hired.

The ProPublica report comes during a period of bipartisan consensus on the growing role of nuclear power in a cleaner U. S. energy future. The ADVANCE Act , signed by President Joe Biden in 2024, passed with broad congressional support. Among other things, the law requires more timely and predictable reviews of license applications for new reactors.

Todd Abrajano, president and CEO of the U. S. Nuclear Industry Council, the trade association for the nuclear energy industry, told me in a statement that many of the changes occurring now stem from the new law and its modernization provisions. "The United States needs a regulatory system that can evaluate next-generation nuclear technologies efficiently while maintaining the rigorous safety standards that have long made the NRC the global gold standard for nuclear oversight," he said.

That's reassuring up to a point, but doesn't stem my flashbacks to the fears and turmoil that consumed all of us —residents, reporters, national and local political leaders, science and tech experts inside and outside government—in the tense week and confusing aftermath of the TMI accident. WNEP-TV in Scranton-Wilkes-Barre (a hundred

miles away from the Middletown plant) captured it in a March 30 segment on the third day of the crisis.

The news tonight is not encouraging. An unexpected release of more radiation from the Three Mile Island nuclear power plant has led to a series of consequences. Certain people have been advised to evacuate, others have been urged to remain indoors. Telephone lines in the Harrisburg area are jammed, and the immediate highways are, too, as more people decide to leave.

Plant officials say that they do not have a meltdown on their hands. The nuclear core is under control. But plant officials do admit some uranium oxide pellets that power the reactor have melted. That is causing heat and steam pressure and the need to vent into the atmosphere. Plant officials say it will go on for five more days. The air is being monitored for radiation. There is none here. Safeway announced it will not buy milk from southern Pennsylvania.

And on and on, with dispatches from correspondents at the scene, for over seven more minutes.

Sign up for a free or paid Bulwark subscription and get our independent journalism delivered to your inbox.

Radiation suits and an airlift plan

A NEWS CONFERENCE CLIP of then-Gov. Dick Thornburgh features anxious reporters throwing out questions about whose radiation readings they should trust, and what dangers various readings posed. "We're getting conflicting reports, too," Thornburgh replied . "There are hundreds of people out there with survey meters," added Tom Gerusky, the state's radiation protection director.

Dick Thornburgh features anxious reporters throwing out questions about whose radiation readings they should trust, and what dangers various readings posed.

Jill Lawrence

Exactly. "For days the people in authority had little idea of what was happening, and less of what would happen next," reporters Peter M. Sandman and Mary Paden, assigned to cover the coverage, wrote later that year in *Columbia Journalism Review* . "They fixed the reactor the way a mechanic fixes a car—they tinkered. When it was all over they tried to figure out what they had done right. With two months' hindsight, we now know what the big story at T. M. I. really was: no one knew enough to guarantee that the genie would stay in the bottle. Call this criminal incompetence or call it the human condition. Either way it was the story."

I had arrived in Harrisburg about six weeks before TMI, the only woman in a five-person Associated Press bureau covering the state capitol, and this was by far the most momentous story of my two-year professional journalism

Do the Next Right Thing: Carl Jung on How to Live and the Origin of His Famous Tenet for Navigating Uncertainty

Maria Popova · *The Marginalian* (Brain Pickings)

“There is no pit you cannot climb out of provided you make the right effort at the right place... do the next thing with diligence and devotion.”

In recent seasons of being, I have had occasion to reflect on the utterly improbable trajectory of my life, plotted not by planning but by living.

We long to be given the next step and the route to the horizon, allaying our anxiety with the illusion of a destination somewhere beyond the vista of our present life.

But the hardest reality to bear is that death is the only horizon, with numberless ways to get there — none replicable, all uncertain in their route, all only certain to arrive. This is why there are infinitely many kinds of beautiful lives . And this is why each and every one of them, even the most seemingly actualized, trembles with a staggering degree of doubt and confusion. Uncertainty is the price of beauty, and integrity the only compass for the territory of uncertainty that constitutes the landmass of any given life.

And so the best we can do is walk step by next intuitively right step until one day, pausing to catch our breath, we turn around and gasp at a path. If we have been lucky enough, if we have been willing enough to face the uncertainty, it is our own singular path, unplotted by our anxious younger selves, untrodden by anyone else.

The recovery community has a shorthand for keeping this at the center of awareness in times of inner tumult: “Do the next right thing.” The concept, in fact, originated two years before the founding of Alcoholics Anonymous, in a lucid and largehearted letter Swiss psychiatrist Carl Jung (July 26, 1875–June 6, 1961) wrote to an anonymous correspondent, included in *Selected Letters of C. G. Jung, 1909–1961* (public library).

On December 15, 1933, Jung responded to a woman who had asked his guidance on, quite simply, how to live. Two generations after the young Nietzsche admonished that “no one can build you the bridge on which you, and only you, must cross the river of life,” Jung writes:

Dear Frau V.,

Your questions are unanswerable because you want to know how one ought to live. One lives as one can . There is no single, definite way for the individual which is prescribed for him or would be the proper one. If that’s what you want you had best join the Catholic Church, where they tell you what’s what. Moreover this way fits in with the average way of mankind in general. But if you want to go your individual way, it is the way you make for yourself, which is never prescribed, which you do not know in advance, and which simply comes into being of itself when you put one foot

in front of the other. If you always do the next thing that needs to be done, you will go most safely and sure-footedly along the path prescribed by your unconscious. Then it is naturally no help at all to speculate about how you ought to live. And then you know, too, that you cannot know it, but quietly do the next and most necessary thing. So long as you think you don’t yet know what this is, you still have too much money to spend in useless speculation. But if you do with conviction the next and most necessary thing, you are always doing something meaningful and intended by fate. With kind regards and wishes,

Yours sincerely,

C. G. Jung

Two months later, in another gesture of generosity and wisdom, Jung deepens the sentiment in a letter to a man who had reached out in abject anxiety and distress, feeling that he had, quite simply, mislived his life. Jung writes:

Dear Herr N.,

Nobody can set right a mismanaged life with a few words. But there is no pit you cannot climb out of provided you make the right effort at the right place.

When one is in a mess like you are, one has no right any more to worry about the idiocy of one’s own psychology, but must do the next thing with diligence and devotion and earn the goodwill of others. In every littlest thing you do in this way you will find yourself. [Everyone has] to do it the hard way, and always with the next, the littlest, and the hardest things.

Yours truly,

C. G. Jung

Complement with a poignant, poetic lens on how to live and how to die and Darwin’s deathbed reflection on what makes life worth living , then revisit Jung on life and death , his rare BBC interview about human nature , and the story of how he and his improbable physicist friend Wolfgang Pauli invented the concept of synchronicity .

Trump Won't Stop—Because He Can't Look Weak

Jonathan V. Last · *The Bulwark*

JVL and Bill Kristol—filling in for Sarah—discuss escalating Iran conflict, the risky push toward a wider war, and why the real damage may outlast the fighting. They also get into the global fallout—from threats to the petrodollar system to the collapse of U. S. alliances—and what a rushed exit might look like.

Disturbing Trailer #2 for 'Faces of Death' Horror with Barbie Ferreira

Alex Billington · *FirstShowing.net*

“That is the first rule of content creation – give the people what they want.” That can be dangerous! IFC has debuted a second official trailer for the disturbing horror film titled *Faces of Death*, a modern meta horror remake of the one of the most infamous cult movies ever. “You can’t unsee it.” Dropping into theaters this April if you’re brave enough for it. A woman, employed as a website content moderator, comes across a series of extremely violent videos reproducing death scenes from a cult film - the original *Faces of Death* (from 1978). That old film played up the “is it real?” angle to make viewers sick. This remake stars Barbie Ferreira & Dacre Montgomery, with Josie Totah, Aaron Holli-day, Jermaine Fowler, and Charli XCX. It’s from the same director of *Cam* and *How to Blow Up a Pipeline*.

“We’re in awe of Goldhaber’s reimagining of *Faces of Death*. His take is unsettling, timely, and provocative, and we can’t wait to unleash it in theaters everywhere this spring.” The freakiest trailer yet (watch the other one) - gross and unsettling and provocative. But just what it needs to get the attention of anyone interested in buying a ticket. Will you? // [Continue Reading](#) >

Fortnite Festival's Official Guitar Controller Is On Sale For A Nice Price Right Now

GameSpot

Amazon's Big Spring Sale rolls on today with even more deals, including a nice discount on PDP's Riffmaster guitar, which can be used with Fortnite Festival and Rock Band 4. Epic Games just recently announced that Fortnite Festival's Battle Stage is shutting down, but the two other modes are staying online. The PDP Riffmaster is currently on sale for \$100, which is 33% off its normal \$150 price point.

See on Amazon

The Riffmaster guitar was built specifically for Fortnite Festival and originally came out in 2024. The wireless guitar controller works with PS5, PS4, Xbox Series X|S, Xbox One, and Nintendo Switch, but you need to buy a different model depending on your platform of choice, so be sure to double check that on Amazon.

It features a built-in, rechargeable battery that promises up to 36 hours of use per charge. The guitar also has a 3.5mm audio jack for playing with headphones, and PDP says it should work within a 30-foot area. Additionally, it has an analog stick on the back of the guitar's neck to help users navigate menus, and comes with a shoulder strap. It also has a collapsible design.

This week's news in Venn diagrams.

James Folta · The Literary Hub

Inspired by something Drew said on The Lit Hub podcast, I've been rethinking how I'm organizing the books I want to read, and trying to cull a little by being a little more honest about what I'm actually going to read. A nice plan, but in practice, I'm just moving books into increasingly precarious piles on the floor around my bookshelves, and this morning I fully tripped over a pile, which dominoed all the rest of the piles into one big mess. It felt like the black-and-white "there has to be a better way" portion of an infomercial, seconds before the SortCo Book Sorter improves my bookshelves and my mental well-being.

In short, I've decided to embrace "chaos shelving" and trust that my next read will come to me, if it's meant to be.

Perhaps you're also buried under used paperbacks and missed some of the news in this jam-packed week. Rest easy, friend, I've got some Venns to catch you up. Hope your weekend has the right blend of tidiness and chaos, and I'll see you back here on Monday.

Callum Turner & Riley Keough in ‘Rosebush Pruning’ Official Trailer

Alex Billington · [FirstShowing.net](#)

“Blood is not only a thing that can turn you on, but also a thing that can set you free – from us.” Mubi has revealed their official trailer for peculiar dark comedy called *Rosebush Pruning*, the latest film made by the extra kooky Brazilian filmmaker Karim Aïnouz. This just premiered at the 2025 Berlin Film Festival a few months ago but it ended up with the worst reviews of the festival (I also hated it). This one’s a dud. Alas Mubi is planning to give it a release anyway for anyone still intrigued. A tedious film about rich people. In an opulent villa beneath the Catalanian sun, American siblings Jack, Ed, Anna and Robert wallow in their isolation as well as a great inherited fortune, eschewing the demands of their blind father, and seeking love and validation through each other and their latest designer clothes.

When Jack, eldest brother and linchpin of this family, announces that he is moving in with his girlfriend Martha, blood ties are severed and Ed is forced to uncover the truth surrounding their mother’s death. Starring Callum Turner, Riley Keough, Jamie Bell, Lukas Gage, Elena Anaya, Tracy Letts, with Elle Fanning, & Pamela Anderson. This reminds me of Glen Powell’s *How to Make a Killing*, but nowhere near as good – way too wacky and messy. // [Continue Reading](#) ›

Episode 916: The Council of Trent? Hello?

Matthew Wrather · [Overthinking It](#)

Support *Overthinking It* by becoming a member for \$5/month!

Pete Fenzel, Mark Lee, and Matt Wrather overthink *Wake Up Dead Man: A Knives Out Mystery*, the latest installment in the Benoit Blanc Cinematic Murder Universe. The panelists appreciated the rich, cinematic presentation of the movie, especially compared to most made-for-Netflix movies, but they also took issue with how the film treats Catholicism more as symbolic wallpaper than as a lived, institutional reality. Where are the baptisms? The first communions? The immigrants? Most importantly, why is everyone so concerned about finding a lost diamond when it would’ve been a lot easier to embezzle the Sunday collection money?

Those critiques aside, everyone appreciated the portrayal of Father Jud as an authentic moral center for the story and as a thematic counterbalance to Benoit Blanc’s cold rationalism. It makes for a very different *Knives Out* movie compared to its predecessors; whether it’s better or worse than those is largely a matter of taste and perspective. But it’s beyond argument that Daniel Craig’s accent remains sublime through them all.

ANALYSIS

Why the ICE Raid in ‘The Pitt’ Matters

Adrian Carrasquillo · *The Bulwark*

Publicity still from The Pitt . (Photo credit: HBOMax via MovieStillsDB)

WHEN I’M NOT COVERING IMMIGRATION, I like to watch prestige TV. I treat it as a way to unwind and give myself space from the chaos and human suffering that often comes when covering immigration in the Trump era.

Which is why it was so jarring last week when one of my favorite shows, *The Pitt*, centered its episode on the main topic of my reporting over the last year: the disruptive impacts of ICE.

For those who haven’t seen it, *The Pitt* is a popular hospital drama where each episode depicts roughly in real time an hour of a day in the emergency room. The show tries to put us in the shoes of people we are not like or whom we have not often considered. It asks us to have empathy and compassion for these patients as well as the people trying to help them within a hospital system, where frustration and emotion can often run high.

Last week’s episode, “5:00 P. M.,” stayed true to those elements, only this time the source of the frustration, drama, and emotion was ICE agents who came storming into the ER. ¹

Things get rolling when some commotion in the ER attracts the attention of Dr. “Robby” Robinavitch (Noah Wyle) and Dr. Cassie McKay (Fiona Dourif). They look up to see two federal agents hauling in a terrified immigrant who is clearly in immense pain.

The immigrant is named Pranita (Ramona DuBarry), and she is a restaurant worker who was caught up in the chaos of a raid and thrown down a flight of stairs, which has likely torn her rotator cuff. It’s hard to find a more true-to-life premise in television right now: Pranita’s plight evokes the memory of so many similar stories we’ve seen and heard over the last year of immigrants trying to flee federal agents or being hurt by them. And of course the two agents who have apprehended Pranita won’t let her call her daughter to let her know where she is.

Get 20% off for 1 year

The presentation of the two ICE agents speaks volumes. The first one, agent Russo (Juju Alexander), is tall and masked; the camera looks up at him in a way that reinforces the sense of threat and intimidation, and you can see the way this sense radiates out to various members of the hospital staff, from the main characters to the other hospital personnel and patients waiting in the ER. The second agent, Correa 2 (Josell Mariano), goes without a mask and for that reason alone seemed infinitely more human than his partner. The Instagram algorithm later served me Mariano’s post about filming the episode: “I found myself imagining what it would feel like to find my own mother or father in that

same situation,” he wrote. He highlighted several behind-the-scenes photos, which he offered at the end to, as he put it, “hopefully make you not hate me.”

I found the actor’s reflections on his performance fascinating, so I reached out to ask for an interview. When we spoke, Mariano told me

The Trump-Biden Debate

Tim Urban · Wait But Why

In case you missed it, here's a transcript of the first Trump-Biden Debate :

Chris Wallace: Good evening. I'm Chris Wallace and I welcome you to what I predict will be a very bad personal experience for me. There will be six 15-minute segments, each on a different topic. At the beginning of each segment, both candidates will get two uninterrupted minutes to respond. The remainder of the segment will be open discussion. The audience has agreed not to be trashy. Both campaigns have signed off on these rules, so for sure nothing will go wrong. And with that, let's welcome the candidates.

[CANDIDATES ENTER]

Wallace: Let's start with the Supreme Court. President Trump, you nominated Amy Coney Barrett to succeed the late Ruth Bader Ginsburg on the court. You say the Constitution is clear about your obligation to nominate someone to the court. Vice President Biden, you've called this an abuse of power. To start, why don't you both explain your positions.

Trump: Amy Coney Barrett is a perfect nominee. Conservatives love her. Liberals love her. Chris Wallace loves her.

Biden: Amy Barrett would repeal the Affordable Care Act. And besides, the new thing is that you have to wait until after the election to nominate someone.

Trump: Not sure what you're talking about, because last I checked a presidential term is four years, not three. You want to instate Communist medicine.

Biden: I don't want to instate Communist medicine. I want to expand Obamacare.

Trump: Your party wants to instate Communist medicine, and you're scared of them.

Biden: I may be scared of them but I am the Democrat Party now, so even if I was and still am scared of them, I'm not anymore. They'll do what I say now. And how about Covid? The president killed 200,000 people. Roe v. Wade.

Trump: You would have killed 2 million people by not banning China. Not Roe v. Wade.

Wallace: K let's go back to healthcare for a minute. Mr. President, over the past four years you have promised to replace and repeal Obamacare, but you have never in these four years come up—

Trump: Yes I have.

Wallace: with a plan—

Trump: Of course I have.

Wallace: to—

Trump: Of course I have.

Wallace: replace—

Trump: I got rid of the individual mandate.

Wallace: Oba—

Trump: The individual mandate was a joke.

Wallace: macare.

Trump: The individual mandate was the worst part of Obamacare.

Wallace: I am the moder—

Trump: The individual mandate sucks dick.

Wallace: I AM THE MODERATOR of this debate and I would like to be treated as such. You have never come up with a plan to replace Obamacare. So what is the Trump healthcare plan?

Trump: I'm cutting drug prices. Insulin is like water.

Wallace: Uh huh. How about you Joe? Why do you want to end private insurance?

Biden: I don't want to end private insurance.

Trump: You're literally friends with Bernie Sanders.

Biden: No I'm not. I want to—

Trump: You're a piece of shit Joe.

Biden: I want to make sure—

Trump: A sad little man.

Wallace: Stop picking on Joe, Mr. President.

Trump: You care deeply about Bernie Sanders. You like Communist medicine. Anyway I asked the doctors and they said Obamacare is a disaster.

Biden: He doesn't have a plan.

Wallace: Changing gears, Joe some of your colleagues are talking about ending the filibuster and packing the court. What's your stance on that?

Biden: My stance is that voting is good. Americans should vote. It's easy. You just go to the polling place, you wait in line, and then you go into the booth, and you push the little switch down for the candidate you want to vote for. Sometimes it's not a switch.

Trump: You gonna pack the court, Joe? Tell us about how you're gonna pack the court, Joe. The radical Left is pulling

The PS5 Price Hike Was Inevitable, But What Comes Next?

GameSpot

It's been a big week for bad news in gaming, and that included Sony announcing yet another price hike for the PlayStation 5, the second increase in less than a year.

When the new PS5 pricing goes into effect on April 2, the base digital edition of the PS5 will have gone up by a whopping \$200 since the system arrived in 2020. What's driving up the price and what does it mean for the industry at large? Here's a breakdown of what Sony has said and deeper context from expert sources.

Sony's official word

Sony's official explanation for the PS5 price hike is that "pressures in the global economic landscape" came together to make it "necessary" to raise prices once more. What the company is saying here is that the so-called "R-Mageddon" situation has proven to be so much of an issue that Sony is taking steps to protect its profit margins, and passing along the increased costs to consumers in the form of a price hike.

Episode 917: Snow is Smooth, Smooth is Fast

Matthew Wrather · *Overthinking It*

Support *Overthinking It* by becoming a member for \$5/month!

Pete Fenzel and Matt Wrather convene cross-country, with snow piled in the East and sun set in the West, to clear their bottleneck of constrained podcast topics. In this storied two-hander, they dissect the perception and reality of bodies of work that strain our ability to perceive and accomplish.

The two share their subjective limits on the feet of snow that had just fallen, from the individual snow shoveler fighting a private war with the sky, to the kaleidoscopic social media snow spectator bombarded by accounts and moments from a hundred cold days while lounging in temperate comfort. These swarming pinholes alluding to some greater image beyond a veil, recall Instagram stories about Taylor Swift concerts or the current state of public truth.

They further consider two masterpieces of slow and steady work done faster than seemed possible: Alex Honnold's methodical ropeless climb of the skyscraper Taipei 101, and the Eliyahu Goldratt novel *The Goal*, an 80s classic about the Socratic method, narrative reinvention, communication in marriage, art's relationship with truth, and very detailed, specific instructions on how to successfully implement lean manufacturing techniques in late 20th century bearing assembly manufacturing plants, which at this

moment has a 50/50 shot of being on the waiting list at your public library.

The work continues, as we consider not how to optimize our own local maxima, but to maximize throughput – of mind, body, and soul. By which we mean duty calls on people especially in positions of authority to accept and enforce accountability for our duty to each other as humans, and also the New York Times rebooted *Scrabble*.

The Space Race from the Cosmonaut Side - 'Star City' Series Teaser

Alex Billington · FirstShowing.net

"I take this step for my country, for my people..." Apple TV has revealed the first look teaser for their new Star City spin-off sci-fi series, a new angle on the streaming hit For All Mankind . This is about the "other side." This time they're telling the same Space Race story from that original series but from the perspective of the Soviet Union. And what would happen if they landed on the Moon first. Ready for streaming in May in just a few months from now. Right as news that For All Mankind is getting one final season , they're already setting up another follow-up. Soviet cosmonauts, engineers, and intelligence officers risk everything in an ambitious space program aiming to be the first to reach the moon.

"Where reaching for space meant risking everything on Earth." The series main cast features Rhys Ifans , Anna Maxwell Martin , Agnes O'Casey , Adam Nagaitis , Alice Englert , Josef Davies , Solly McLeod , & Ruby Ashbourne Serkis . This is a fascinating alternate history concept and I'm very, very curious to see if they can pull it off. For All Mankind is already a huge hit and this might also be, too. Only a quick look at 30 seconds of footage so far. // Continue Reading ›

Jack Dunn, Variety: HBO boss Casey Bloys recently told The Times of London that the network is already developing the second season of the highly anticipated "Harry Potter" TV series. "Our goal is to not have a huge gap, you know, especially because the kids are growing," Bloys said. "It's not going to be an annual; the show [...]"

Danielle Chelosky, Stereogum: Last year, Dua Lipa was busy touring 2024's Radical Optimism and bringing out guests like Charli XCX and Ben Gibbard in addition to performing covers like Sinead O'Connor's "Nothing Compares 2 U" and Daft Punk's "Get Lucky ." Now, the British singer is getting ready to focus on acting again, as she's joined the cast for Molly Gordon's new movie Peaked .

Jack Dunn, Variety: "The Pitt" Season 2 star Sepideh Moafi recently told People that her first agent told her to change her name so that she could land more roles. "When I graduated from grad school, my first agent wanted me to change my name and I immediately said, 'Fuck no,'" she recalled. "I know actors who have [...]"

Chris DeVille, Stereogum: Like many bands of yesteryear, the Scottish rockers Big Country, makers of the 1983 hit "In A Big Country," have splintered into various units on the touring circuit over the years. Also like many of those bands, they're now fighting about who gets to use the band name.

Patrick Hipes, Deadline Hollywood: The video spread at a velocity only social media can generate. Missiles rained down on the USS Abraham Lincoln, blasting fighter jets into the sea, the vessel breaking apart in a dramatic fireball — shared millions of times before anyone thought to ask whether the carrier was still sailing. It was. Analysis using the AI [...]"

Natalie Oganessian, Deadline Hollywood: Alex Duong, a comedian, writer and actor based in Los Angeles, has died at the age of 42. Duong was diagnosed with alveolar rhabdomyosarcoma last year, a rare and aggressive cancer affecting soft tissue. He underwent surgery to remove a malignant growth that was blocking blood flow to his optic nerve and caused vision loss. [...]"

Apple Newsroom, Apple Newsroom: "Friday Night Baseball" — a weekly MLB doubleheader on Apple TV — returns for its fifth season on March 27.

Apple Newsroom, Apple Newsroom: Today, Apple announced iPhone and iPad are the first and only consumer devices in compliance with information assurance requirements of NATO nations.
