Life and Death in Singapore

SiriusXM Podcasts and Roman Mars · 99% Invisible

When Singapore gained its independence they went on a mission to re-house the population from densely-packed thatched roof huts into giant concrete skyscrapers. In 1960, they formed the Housing and Development Board, or HDB, and just five years later they had already housed 400,000 people! In Singapore, where land is scarce, it's not unlikely for apartment buildings to be built on top of land that was graveyards not too long ago. But building on top of a graveyard has its complications.

‘Biggest Swell in Years’ Slams Bondi Beach with 12ft Bomb Sets (Video)

Dashel Pierson · Surfer Magazine

While Bondi Beach may be one of Australia’s most popular shorelines, it’s not known typically for surf – there are plenty of other waves that regularly produce world-class surf in the region, leaving Bondi for the sunbathing and splash-splashing crowd.

However, a strong pulse of south swell, one dubbed perhaps “the biggest south swell in years,” slammed the coastal Sydney suburb over the weekend.

And a handful of surfers paddled out, with crowds on the headlands watching on, to witness the potentially historic waves, pushing into the 12-foot range. See below.

[View this post on Instagram](#)

Surfline captioned:

“Local chargers putting on a show for the spectators at Bondi Beach right now.

But they also gave a caveat regarding the wave size:

“These wave heights are in the Traditional scale. You can change between Face Heights or Traditional in the settings of your Surfline app.”

[View this post on Instagram](#)

Elsewhere, in the buildup to the incoming south swell, which bubbled up from Tasman Sea, and made its way towards the East Coast of Australia, Surfline had high hopes, claiming, “The biggest S swell in years is lining up this weekend.” They continued :

“An intense low tightens up near the NSW coast, then pulls away Friday evening as winds ramp up and a broad storm field sets from Tasmania to the Mid North Coast. XL surf builds overnight, with Saturday morning shaping up as possibly one of the biggest days in years. Expect a messy mix. There will be plenty of shorter period storm surf and wind chop stacked through the swell, with occasional long period bomb sets swinging through and catching plenty of crews out.”

Related: Bull Shark Mauls Dolphin in Sydney: ‘Is This Normal?’ (Video)

Elsewhere, to the north, at Manly Beach, spectators were nearly swept away as the humungous waves battered the coastline. See below.

[View this post on Instagram](#)

Officials urged those looking to witness the potentially historic swell to heed caution:

“A reminder from today for swell watchers to be prepared for the unexpected as the waves can get sneaky and leave you saturated or swept away, especially at Dee Why pool!”

Stay tuned; more to come from this run of swell.

‘Wave Pool King’ Stomps NBD Superman 360 Shuv-It at Waco Surf (Video)

Dashel Pierson · Surfer Magazine

Jacob “Zeke” Szekely is many things, but humble is not one of them.

Related: Aerialist Sorcerer Sticks ‘First-Ever’ Superman Fingerflip (Video)

The San Diego native is one of surfing’s biggest characters, making a name for himself early on by winning a competition while wearing a court-ordered ankle bracelet, turning his life around, and becoming one of the most prolific surf vloggers in the game.

And what he lacks in humility, he makes up for in hard work. Like pushing the limits in terms of sticking new tricks, particularly in surf parks, and dubbing himself “the king of wave pools.” And Zeke has a new one for his extensive bag of never-before-done tricks, a superman air into a 360 shuv-it, landed at Waco Surf deep in the heart of Texas.

[View this post on Instagram](#)

“I’M THE KING OF THIS SHIT,” Zeke boastfully captioned. “Quit Playyin w/ Me! Nobody has Landed as many New Tricks as Me!! & I’ve been Dreaming of Landing a 360 Shuv it for like 8 years now. SuperMan 360 Shuv. Huge Thx to @wacosurf_tx for having us & shout out to my homies for Hying me up the last two days to stomp it.”

Impressive.

Related: 25-Foot Uluwatu: ‘Biggest Waves I’ve Ever Seen Here’ (Video)

And the congrats on the new trick rolled in, along with a note or two on his audacity.

“My goat!!!!” – Eithan Osborne

“I remember going to waco with you in 2019 and you were already way ahead of the game. Still got the thrown all these years later.” – Ridge Lenny

“Let’s goo Zeke! Keep doing you brother!” – Josh Kerr

“That was sickkk.” – Albee Layer

“Bro! When your skill level catches up to your humility you’re going to be unstoppable!!! OTC BABY!!!” – Luke Cedarman

Previously, during a stint in Indonesia, Zeke landed another NBD – a superman fingerflip – and he shared it with the world accompanied by his trademark bravado:

[View this post on Instagram](#)

“Don’t forget I started that finger flipping shit in 2020. So if you don’t like it, YOU CAN SUCK IT!”

Classic Zeke. Never change.

Roman Mars Describes Athens GA As It Is

roman mars · 99% Invisible

This is the third and final episode in a three-part series of Roman Mars recording on-location guides to the design features and interesting spots in cities he loves.

Roman moved to Athens, Georgia, to pursue a PhD in plant genetics, but dropped out and got into the local music and art scene instead, and started making his way toward radio.

Constitution Breakdown #1: Nikole Hannah-Jones

Nikole Hannah-Jones, Elizabeth Joh · 99% Invisible

This is the first official episode of our ongoing series breaking down the U.S. Constitution.

This month, Roman and Elizabeth discuss the Preamble, alongside Nikole Hannah-Jones.

Elizabeth also explains that while the United States generally does not allow a standing army to be used against civilians, Trump has been exploiting an exception to keep troops in Los Angeles to protect ICE agents — with terrifying implications.

IN BRIEF

Lasha Madan, Vivian Le, Kurt Kohlstedt, 99% Invisible: At a glance, the border between the United States and Canada would seem to be at the friendlier end of the international boundary spectrum. But even though the US-Canada border is now pretty tame, when two countries touch each other over a stretch of 5500 miles, it can result in some surprisingly weird disputes, misunderstandings, geographical quirks and... really good stories.

The Megaplex!

Roman Mars, Katie Mingle, Ryan Kailath, Joe Rosenberg · 99% Invisible

Back in the early 1990s, movie theaters weren't that great. The auditoriums were cramped and narrow, and the screen was dim. But in 1995, the AMC Grand 24 in Dallas changed everything. It was the very first movie megaplex in the United States. This is the gigantic, neon, big-box store of moviegoing that we're all used to today, and it's easy to dismiss as a tacky '90s invention. But the megaplex—specifically this first megaplex in Dallas—upended the entire theater business and changed the kinds of movies that got made in ways you might not imagine.

Photographing Spring Flowers with Artistic Intent

500px Blog · 500px ISO

Spring brings a burst of color and renewal, making it the perfect time to explore artistic interpretations of nature through photography. Photographing spring flowers with artistic intent goes beyond documentation, it's about evoking mood, emotion, and story. Here's how to bring a creative lens to your floral captures this season.

Before clicking the shutter, take a moment to consider what story or mood you want to convey through your image. Are you drawn to soft, romantic aesthetics? Or do you prefer bold colors and graphic shapes? Let this intention guide your composition and post-processing choices.

Use shallow depth of field (f/2.8–f/4) for dreamy, blurred backgrounds.

Frame your subject with natural elements to create depth and visual interest.

Light as Your Creative Partner

Photographing spring flowers with artistic intent means being intentional with lighting. Natural light, especially during golden hour, can add warmth and texture to your floral scenes.

Shoot during early morning or late afternoon for soft, diffused light.

Experiment with backlighting to highlight petal translucency.

Use a reflector or white surface to gently bounce light and reduce harsh shadows.

Explore Composition and Perspective

Change your vantage point to avoid typical top-down shots. Try photographing at flower level, from behind, or even through other foliage for a more immersive and unique perspective.

Incorporate negative space to evoke serenity or simplicity.

Try minimalist framing or off-center placement using the rule of thirds.

Play with Color and Texture

Spring offers a vibrant color palette. When photographing spring flowers with artistic intent, pay attention to complementary colors and repeating patterns. Let texture and color contrast carry the image's emotion.

Pro Tip: Create a Floral Series with Purpose

Instead of one-off shots, consider creating a cohesive photo series that explores a specific flower type, color palette, or compositional theme. This approach encourages consistency, deepens your understanding of visual storytelling, and can be shared as a collection that reflects your unique creative perspective.

Extended reading: Transforming ordinary scenes with vibrant colors

The Address Book

Roman Mars · 99% Invisible

An address is something many people take for granted today, but they are in fact a fairly recent invention that has shaped our cities and taken on great political importance. Deirdre Mask is the author of *The Address Book: What Street Addresses Reveal About Identity, Race, Wealth, and Power*, which looks at all the ways the world has changed since the popularization of street addresses during the Enlightenment. The book examines how addresses impact wealth and poverty, and how they serve as proxies for our most contentious debates. Mask also explores a digital future where we aren't reliant on the numbers on our homes to tell us where we are or where we're going.

Cactus Jack Channels the “Gangster SpongeBob” Memes With Surprise Apparel Collaboration

Hypebeast

Cactus Jack has officially linked up with SpongeBob SquarePants for a collaborative apparel collection

The capsule features heavyweight cotton garments with unique hand-sprayed treatments and distressed details

Fans can secure pieces ranging from graphic tees to hoodies through the official Travis Scott webstore

Travis Scott's Cactus Jack has officially crossed over into Bikini Bottom, dropping a surprise SpongeBob SquarePants x Cactus Jack collection. The collaborative capsule merges the Houston native's signature aesthetic with the ever-popular “Gangster SpongeBob” meme, resulting in a lineup of streetwear staples that channel spray paint art and graphics that reimagine the Bikini Bottom crew.

Anchoring the release is a series of heavyweight pieces, including the Fancy Life and Patrick Star hoodies alongside the Chum Bucket, SpongeBob x Mr. Krabs, Krabby Patty, and even Doodlebob T-shirts. The garments are elevated by co-branded artwork, utilizing screen print details on the front and back. Selected pieces receive a specialized freehand spray treatment, ensuring each individual item maintains a unique, one-of-one nature.

Also joining the delivery is the Rock Bottom Thermal Longsleeve, which focuses on Squidward, and a zip hoodie with Sponge-

Bob and Mr. Krabs showing off their wads of cash. Rounding out the collaboration are an adjustable low-profile Rock Bottom Hat, which features a distressed embroidered patch, and a duo of beanies for SpongeBob and Patrick. By blending familiar underwater motifs with Scott's distinctively muted, earthy design language, the collection offers a fresh take on classic cartoon merchandising.

Check out the release above. The Cactus Jack x SpongeBob SquarePants collection is available now via Travis Scott's official webstore.

The Red, the Black, and the Green

Christopher Johnson, Emmett FitzGerald · 99% Invisible

After Minneapolis police officer Derek Chauvin murdered George Floyd last year, tens of thousands of people all over the world took to the streets to protest police violence against Black people. And if you look at images from these marches, you will probably start to notice a common color scheme – one involving a lot of red, black, and green. The flag was invented to unite Black people all over the world living under racial repression. When it first came into existence, the flag posed some bold questions about where Black people owed their loyalty: was it to the nations where their lives were demeaned and threatened? Or to a new nation - one they would build entirely for themselves? For hundreds of thousands of Black people, the red-black-and-green symbolized the answer.

Whomst Among Us Let the Dogs Out AGAIN

emmett fitzgerald, chris berube · 99% Invisible

All kinds of songs get stuck in your head. Famous pop tunes from when you were a kid, album cuts you've listened to over and over again. And then there's a category of memorable songs—the ones that we all just kind of know. Songs that somehow, without anyone's permission, sneak their way into the collective unconscious and are now just lingering there for eternity. There's one song that best exemplifies this phenomenon— “Who Let The Dogs Out” by the Baha Men.

The story of how that song ended up stuck in all of our brains goes back decades and spans continents. It tells us something about inspiration, and how creativity spreads, and about whether an idea can ever really belong to just one person.

Archinect's latest featured hiring firms include Moore Ruble Yudell, Chu-Gooding, West of West, Kramer + deConciliis, and Brownstone Boys

Nathaniel Bahadursingh · Archinect News

From Archinect's active community of job seekers, firms, and schools, we have selected five featured architectural employers with current openings in New York/Brooklyn, Los Angeles/Santa Monica, Portland, and Southold, New York.

For even more opportunities, visit the Archinect job board and explore our active community of job seekers, firms, and schools.

Architecture and design studio West of West has three exciting positions available: an Architect and a Designer in Los Angeles, and a Designer in Portland. The ideal Architect possesses eight to ten years of experience and has a proven track record of project leadership in Los Angeles, including permitting and CA. The Designer in Portland must have five-plus years of experience, and the Designer in Los Angeles needs to have three to five-plus years of experience. Each role requires high-level skills with Rhino, Revit, and Adobe Creative Suite.

In Santa Monica, Moore Ruble Yudell Architects & Planners has a...

The Return of Con Law

Isabel Angell, Elizabeth Joh, Roman Mars · 99% Invisible

At the January 6th Capitol insurrection, rioters waved Confederate, MAGA, and Trump-as-Rambo flags. Easy to miss without knowing the design was a bright yellow flag with three red stripes — the flag of South Vietnam.

There were actually several confounding international flags present at the Capitol riot that day: the Canadian, Indian, South Korean flags, all were spotted somewhere in the mayhem. But what was peculiar about the Vietnamese flag being there was that it's not technically the flag of Vietnam but the Republic of Vietnam, a country that no longer exists. And what this flag stands for (or should stand for) remains a really contentious issue for the Vietnamese American community.

This episode originally aired in 2021.

Yankee Pyramids

Delaney Hall, Elizabeth Joh, Chris Berube · 99% Invisible

We heard you. The chorus of voices asking “where is Con Law ? Where is Professor Elizabeth Joh to guide us through this madness? We need it now more than ever!” Well, here it is. We’re back with a special extra-long episode about Trump’s perverted use of the Alien Enemies Act to deport people without due process and how judges are trying to hold the administration accountable to the Constitution.

Plus, we announce the launch of The 99% Invisible Break-down: The Constitution , where Elizabeth and Roman will tackle a different section of this 7600-word document each month, treating the Constitution as a text to be analyzed.

The Return of Con Law

Start a free trial now on Apple Podcasts or by visiting siriusxm.com/podcastsplus .

Presidential libraries are tributes to greatness, “[a] self-congratulatory, almost fictional account of someone’s achievements, where all the blemishes are hidden,” explains one New York architect. But they’re also a “weird mix of a historical repository of records and things that have a lot of meaning.” Studying their origins and evolution, one can begin to see how presidential libraries have always involved tensions and contradictions.

The premise of using the extreme example of Trump to heighten the contradictions of executive branch norms is what we do on Roman’s other podcast What Trump Can Teach Us About Con Law . It’s good! And it’s not really about Trump, so don’t worry. It’s essentially a current events based Constitutional Law class taught by an incredible professor, Elizabeth Joh. We included the latest episode here for you to check out.

The Rights of Rice and Future of Nature

Delaney Hall, Ozzy Llinas Goodman, Rose Eveleth · 99% Invisible

The Ojibwe name for wild rice is Manoomin, which translates to "the good berry." The scientific name is *Zizania palustris*. It's the only grain indigenous to North America, and while it might be called rice, it's actually not closely related to brown or white rice at all. It has long played an important role in Ojibwe cultures, but last year, Manoomin took on a new role: plaintiff in a court case. Last August, the Minnesota Department of Natural Resources was sued by wild rice. The case of *Manoomin v Minnesota Department of Natural Resources* alleges that the Minnesota DNR infringed on the wild rice's right to live and thrive. But can wild rice sue a state agency? The short answer is: yes. This is the story about what might happen if rice wins.

San Francisco Cliff Rescue: Woman Dangling 70ft Above Ocean Beach Saved (Video)

Dashel Pierson · Surfer Magazine

A dramatic scene unfolded, yesterday, in San Francisco as a woman was rescued from a cliff overhanging the fabled, yet foreboding, Northern California surf zone, Ocean Beach.

The unidentified woman was dangling 70-feet above the crashing waves, at the north end of Ocean Beach, just below the historic Cliff House. She was barefoot, and bikini-clad. That's when San Francisco Fire crews arrived on the scene and began the rescue.

Helicopters were on the scene to capture it all on camera; see below.

Following the rescue, San Francisco Fire Department Lieutenant Ken Smith said in a statement :

“1 female patient has been retrieved from the cliff and is now being evaluated by fire personnel on scene. At 4:50 pm the Victim has been rescued and is now being evaluated by medical personnel to determine if hospital transport is necessary. There have been no injuries to any fire department members during this rescue.”

Firefighters used ropes to repel down the cliff, and retrieve the woman. As of now, it's unclear how the woman got stuck on the cliff, nor has her identity been released. According to the fire department statement, it sounds like no injuries were sustained.

Related: Hero Rescues Father, Daughter from Near-Death Drowning (Video)

As for the Cliff House, which overlooks the northern edge of the storied gladiator pit of a surf zone that is Ocean Beach, it is steeped in history. Here's a snippet :

“After the Gold Rush, San Francisco's population exploded and the city's downtown area got very crowded with new buildings and neighborhoods. Real estate developers, eager to make more money, saw Lands End and its unparalleled beauty as a new place to develop. They constructed the Cliff House in 1863 as a fashionable resort for the wealthy. The modest one-story wood-frame structure was skillfully situated on top of the cliff overlooking Seal Rocks, providing breathtaking panoramic views of the Pacific Coast line.”

Sadly, a restaurant that operated in the Cliff House closed during the COVID-19 pandemic.
