

CT Stars Ditch Surf Giants for Ice Cream, Nike and Lexus Deals

In a few days' time, the WSL's Championship Tour will begin its 2026 season, launching its first event out of Bells Beach.

Jason Lock · Surfer Magazine

The competition window opens from April 1st, running through to the 11th, before swinging over to the other side of Australia for the West Aus leg of the tour.

Molly Picklum and Yago Dora are your defending champions. And as the surfing world, or maybe the world in general, is in a constant state of flux, we wanted to pause and take stock of who has any new stickers adorning the business-end of their surfboard. Even this year, there's been a few surprises, Tyler Wright no longer with Rip Curl – leaving her a free-agent. Anyway, here's what we found out about what's new for the CT roster:

align="center"> Related: How To Prevent Surfer's Ear – And What To Do If You Have Early Signs

Liam O'Brien – Last month, Boform Australia – a concrete construction company – confirmed they will be supporting LOB for another year, continuing their long-standing relationship.

Yoga Dora – It's well-known that last year's world champ jumped ship after 12-years with Volcom over to Vissla. A savvy signing for the Paul Naude helmed biz. It's understood that Stokehouse (Vissla's parent company) are making a bid to buy Rip Curl too. We'll see how this one plays out.

Italo Ferreira – Back in 2023, Italo lost his long-time sponsor Billabong. By 2025, surfing's first ever Olympic champion announced he'd penned a fresh deal with Nike – the first time the brand's sponsored a surfer in more than a decade.

Leonardo Fioravanti – In June last year, Leo Fio announced he'd signed with tire company Pirelli, to make traction pads, be sold exclusively through Bell surf stores. Bell is of course, Stephen Bell's company – Belly being a surfing force for

more than 30 years – and step-dad, mentor, coach and bff to Leo.

Mateus Herdy – In August 2025, Brazil's Mateus Herdy signed with Rivvia Projects, a clothing brand founded by CT alumni, Julian Wilson.

Kanoa Igarashi – Continues his partnership with JS Industries, after making the jump from Sharp Eye last year. Also last year, Kanoa came on board as a brand ambassador for TaylorMade Golf Japan, which makes sense given he's into it. The Olympic silver medalist is also on the Lexus team, joining Griff and newly adorned Lexus-ite, Caroline Marks .

Connor O'Leary – Last month, apparel brand Afends announced Connor had joined the team – their sticker now right up top of the Aussie-born, Japanese athlete's DHD boards.

Caroline Marks – Just a few days ago, Lexus announced they were bringing the world number two surfer onto their expanding team, gifting the Floridian a 2026 Lexus GX for the pleasure.

Gabriel Medina – Earlier this year, Gabby announced a departure from Rip Curl, a deal that lasted for almost two decades. Medina's next moves are under wraps – though last month, Sorvetes Los Los, an ice cream outfit out of São Paulo, Brazil, announced he was their new ambassador. And then, just a few weeks ago, Gabriel was pictured at his inaugural Medina Surf Fest with UVV On atop the nose of his board. This is Universidade Vila Velha, a private education joint in Brazil. Talk about non-endemic support. It was

revealed they're supporting Medina for three years, and remains to be seen what level of investment that looks like.

Marco Mignot – Last year's Rookie of the Year has just penned a fresh three-year deal with long-time sponsor, Quiksilver.

Jack Robinson – Back with JS Surfboards. A full circle moment given JS made boards for Robbo in 2013 too. Earlier this month, it was announced Jack's returning to the brand, after leaving Sharp Eye. Jack made the final five last year, after winning the Lexus Tahiti Pro in Teahupo'o. Let's see what pep JS can do to boost him further up the rankings.

City Simmers – The 2024 world champion signed up with VEIA Supplies as an ambassador last year. VEIA is a rider-owned business founded by John John Florence and Jon Pyzel, supplying traction, board bags and leashes.

Filipe Toledo – Not new per se, but in December 2025, Filipe officially became a partner at Sharp Eye Surfboards, his long-term board sponsor. The deal is lifelong, so we're never going to see Filipe with any other foam under foot.

Kauli Vaast – Has launched a partnership with Novotel, called the Novotel 37 Collective, which is a global team of athletes, innovators, wellness experts and more who are leading the way with small sustainable changes to their every day life. According to the press release, it's focussed on making 1% changes every day to build a long-lasting positive impact. How this looks for the bottom line of Kauli is unknown, but an interesting arrangement nonetheless.

Tyler Wright – Unknown who will pick up the two-time world champion, after her sponsorship with Rip Curl was not renewed this year. Watch this space.

Tya Zebrowski – The youngest ever surfer to qualify for the Championship Tour has joined Red Bull's team this year, ahead of her rookie season. Tya's a phenom, Tahitian born, Hossegor raised and has been putting in the pre-season training in Hawaii.

align="center"> Related: How To Choose A Three-Board Quiver

Mateus Herdy – In August 2025, Brazil's Mateus Herdy signed with Rivvia Projects, a clothing brand founded by CT alumni, Julian Wilson.

FEATURES

The Best Black Friday Deals for Runners

TJ Pitre · Trail Runner Magazine

There are Black Friday deals galore on running shoes, apparel, and accessories! We'll keep updating our deals content through the holiday week to Cyber Monday, so check back often to find the gear you want at amazing discounts.

Not sure what's hot this holiday season? Review the 2024 RUN Holiday Gift Guide for ideas, check out the 2024 Triathlete Holiday Gift Guide, or browse the running deals at the REI Big Winter Sale or the direct-to-consumer Black Friday sales listed below.

Black Friday Deals and Discounts

Wahoo KICKR RUN Smart Treadmill + Accessories Package, \$5,000

Special Deal: Use code TURKEYTROT at checkout and receive a free KICKR Headwind smart fan and TRACKR heart rate monitor — a \$330 value!

Wahoo's new KICKR RUN treadmill is the most advanced treadmill ever made. It brings cutting-edge technology to your run experience, helps minimize distraction and maximize the realism of running indoors.

Nike Zegama 2 (\$180) \$127 — 29% off!

Shop Women's Now — \$127 Shop Men's Now — \$127

Weights: 9.4 oz. (women's 8), 10.8 oz. (men's 9)

Heel-Toe Offsets: 4mm drop; 39mm (heel), 35mm (forefoot)

Equipped with an ultra-responsive ZoomX foam midsole, the Zegama 2 is designed to conquer steep ridges, jagged rocks and races from trailhead to tip. Optimal cushioning complements a rugged outsole made for your trail running journey. (Use code ACCESS for an additional 25% off.)

Asics NovaBlast 4 (\$140) \$110 — 21% off!

Weights: 9.4 oz. (women's size 8), 7.6 oz. (men's size 9)

Heel-Toe Offset: 8 mm (41.5mm in the heel, 33.5mm in the forefoot)

Shop Women's Now Shop Men's Now

The Novablast 4 is a good primary training workhorse or secondary model that offers a great blend of cozy comfort, lively cushioning, and do-almost-everything versatility. If you like a soft, comfortable, energetic vibe in every kind of run you do during any given week, the Novablast 4 can be your versatile only-tool-in-the-tool-box kind of shoe.

Suunto Vertical (\$839) \$639 — 24% off!

Shop now — \$639

The Suunto Vertical is a lightweight watch with multisport functionality, a large 49mm display with a bright, easy-to-read screen, Wi-Fi connectivity, colorful off-grid mapping, extremely long battery life and solar charging capabilities. (Solar charging is available only in the high-end titanium model of the Vertical.) Its intuitive maps tell you all you need to know about the landscape with contour lines, water, paths and other important landmarks available in three different map styles. In addition to basic daily activity tracking — steps, heart rate, sleep, calories, stress — it smoothly and accurately tracks running data, elevation and run-tracking data that syncs directly with Strava and other apps. Plus, it offers more than 90 training modes that cover a wide range of sport disciplines.

Hoka Clifton 9 (\$145) \$116 — 20% off!

Shop Women's Now — \$116 Shop Men's Now — \$116

Heel-Toe Offset: 5mm (32mm in the heel, 27mm in the forefoot)

Hoka has revitalized the midsole to make it slightly lighter and also much more responsive. There's an additional 3mm of midsole foam in this year's Clifton, but more importantly, the midsole is now made from a lightweight and very responsive compression-molded EVA that gives the shoe a smoother and bouncier feel than in recent years. The Clifton 9 also features a partially-gusseted tongue for the first time and a new Creel Jacquard mesh to help cinch down the fit and protect against debris. A new outsole design provides more durability and control.

Adidas Terrex Agravic 3 (\$130) \$98 — 25% off!

Shop Women's Now — \$98 Shop Men's Now — \$98

Heel-Toe Offset: 8mm; 32.5mm (heel), 24.5mm (forefoot)

The Agravic 3 has just the right amount of cushioning that allows it to provide a cushy, semi-responsive ride, but it's also close enough to the ground to offer really good proprioceptive "feel" for the trail surface. There is just enough moderate trail-specific protection — including lightly reinforced toe bumpers, abrasion-resistant sidewalls, the rugged and durable Continental rubber outsole, and the interior rock plate — to defend against the elements.

Garmin Forerunner 55 (\$199) \$149 — 26% off!

Shop Now — \$149

This easy-to-use GPS smartwatch is designed for people of all skill levels to track their stats and chase their fitness goals.

Brooks Adrenaline GTS 23 (\$140) \$100 — 29% off

Shop Women's Now — \$100 Shop Men's Now \$100

Weights: 9.1 oz. (women's 8), 10.8 oz. (men's 9)

standard-article(title: [PMC REACHES THE MILLION ARTICLE MARK], author: [PubMed Health], source-name: [PubMed Health], images: (), paragraphs: ([PubMed Central (PMC) reached the one million-article mark the week of June 18, 2007. Now in its seventh year, PMC is enhanced each week with articles from over 350 important life sciences journals whose publishers have agreed to deposit current issues. Many of the participating publishers have also benefited from the PMC Back Issue Digitization Project, where NLM scans older issues from cover to cover, starting with volume 1, and creates PubMed citations for articles that are not in PubMed. Jointly sponsored by the Wellcome Trust and Joint Information Systems Committee (JISC) in the UK, the NLM scanning project has collected and collated over 5 million pages of material. As of June 2007, these scanned articles accounted for 675,000 of the million articles in PMC.],), insert-map: (:), word-count: 125, edited-for-length: false, debug-mode: false,)

standard-article(title: [A universal week], author: [Petr Mitrichev], source-name: [Petr Mitrichev (competitive programming)], images: (), paragraphs: ([Last week, the main round was the 3rd Universal Cup Semifinals (problems , results , top 5 on the left, analysis , contest stream , closing ceremony stream). For those not familiar with the Universal Cup, this announcement has some links for more information, but in short, it is a competition with many online stages throughout the year (40 in the 3rd season, but the organizers plan to reduce the number significantly for the 4th season to reduce the pressure on the teams trying to qualify for the Finals), each stage being a 5-hour contest with ICPC rules, usually with the problems from a regional or another previous non-public contest. The results over all stages are then aggregated into a rating (the formula will also be changed for the 4th season), and the top teams from this rating are invited into the Finals , which took place onsite in China for the 2nd season, and it's not yet clear if it will be onsite or online for the 3rd season that just finished. Recognizing the fact that some strong teams do not have the time to participate regularly, the organizers also host a Semifinals competition online, where every team can enter, and a few more spots for the Finals are won.], [Team USA1 has continued their domination of the Universal Cup — congratulations! Since they and a few other teams at the top have already qualified for the Finals by the virtue of their regular season result (also 1st), the first team who advanced to the Finals from this round was team arvin and errogame, and maybe even more importantly, the last team who advanced to the Finals from this round (future cancellations notwithstanding) was team Dvoe protiv vetra. Well done to all finalists!], [I and my team were also looking forward to participating in this round, but unfortunately a last-minute conflict interfered with my plans. Now I think we need to do at least one and hopefully more stages of the 4th season instead!], [This week Codeforces Round 1046 led the way (problems , results , top 5 on the left, analysis).
