C HICAGO, ILLINOIS - MARCH 29: Head coach Dusty May of the Michigan Wolverines reacts against the Tennessee Volunteers during the second half in the Elite Eight of the 2026 NCAA Men's Basketball Tournament at the United Center on March 29, 2026 in Chicago, Illinois. (Photo by Michael Reaves/Getty Images) | Getty Images

class="has-text-align-none">The No. 1-seed Michigan Wolverines and No. 1-seed Arizona Wildcats will duke it out on Saturday in the Final Four in Indianapolis with a spot in the National Championship Game on the line. No pressure or anything.

class="has-text-align-none">We are now learning more details about when the game will begin and how we can watch it. The Wolverines and Wildcats will tip-off around 9 p.m. or so and can be viewed on TBS, TNT and truTV. No. 2-seed UConn and No. 3-seed Illinois will be the first game of the day and begin at 6:09 p.m.

— March Madness Men's Basketball TV (@MM\_MBB\_TV) March 29, 2026

No. 16-seed Long Island: 92-58

No. 9-seed Utah State: 78-66

No. 4-seed Arkansas: 109-88

No. 2-seed Purdue: 79-64

class="has-text-align-none">The Wildcats are led by Big 12 Player of the Year, senior guard Jaden Bradley. He averages 13.3 points, 4.4 assists and 3.5 rebounds per game while

shooting 46 percent from the field and 39.4 from beyond the arc. Arizona also has a pair of highly talented freshmen in guard Brayden Burries and forward Koa Peat. Burries leads the team in scoring (16.1 points per game, 50 percent from the field, 40.2 percent from three) while Peat isn't far behind (14.1 points per game, 54.4 percent from the field).

class="has-text-align-none">But Big Ten Player of the Year and Most Outstanding Player of the Midwest Region, Yaxel Lendeborg, is going to give the Wildcats all they can handle. After only scoring nine points in the Round of 64 victory over Howard, he lit up the scoreboard with 25 against Saint Louis, 23 against Alabama and 27 against Tennessee.

### SRA Status Update

PubMed Health

SRA Archive is still in service.

Recently, NCBI announced that due to budget constraints, it would be discontinuing its Sequence Read Archive (SRA) and Trace Archive repositories for high-throughput sequence data. However, NIH has since committed interim funding for SRA in its current form until October 1, 2011. In addition, NCBI has been working with staff from other NIH Institutes and NIH grantees to develop an approach to continue archiving a widely used subset of next generation sequencing data after October 1, 2011.

We now plan to continue handling sequencing data associated with:

RNA-Seq, ChIP-Seq, and epigenomic data that are submitted to GEO

## Genomic and Transcriptomic assemblies that are submitted to GenBank

16S ribosomal RNA data associated with metagenomics that are submitted to GenBank

In addition, NCBI will continue to provide access to existing SRA and Trace Archive data for the foreseeable future. NCBI is also continuing to discuss with NIH Institutes approaches for handling other next-generation sequencing data associated with specific large-scale studies.

standard-article( title: [A double prix week], author: [Petr Mitrichev], source-name: [Petr Mitrichev (competitive programming)], images: (), paragraphs: ( [Before I cover the last week, I need to mention the 4th Universal Cup Stage 5: Nanjing, which happened the week before and which I forgot to cover ( problems , results , top 5 on the left, analysis in Chinese ). Even having only 2 out of 3 teammates did not stop team USA1 from winning by a whole problem. Congratulations!], [The Universal Cup can't stick to the plan of having rounds only every other week, so Stage 6: Shenyang took place last week ( problems , results , top 5 on the left, analysis in Chinese ). The first two places look suspiciously similar to the previous round, but for the veteran teams Polish Mafia and Almost Retired Dandelion who also solved everything this was the best result of the season. Well done!], [Codeforces Round 1066 wrapped up the week ( problems , results , top 5 on the left, analysis ). Some of the Universal Cup stars were also strong this time, but they were complemented in the top 5 by jiangbowen and PEIMUDA who were not at the very top in the team rounds. Congrat-

Announcing New dbVar FTP Directory Structure

The dbVar directory structure FTP directory was updated April 1, 2018. The old directories will be in data.old until May 1, and then can be found in archive .

Highlights include:

- added aggregated vcf files by assembly
- named files based on major assembly and region or call
- replaced study-specific directories with file-type directories
- renamed “.tab” files to “.tsv”
- moved old human and all non-human files to archive

Refer to README.ftp for full details of the new GVF, VCF, TSV, and XML files.
